New Hampshire Construction Cost Index (6 groups of items)

The graph above displays the average changes every 6 months of the six item groups as displayed below. The FHWA NHCCI number for the current period shall not be finalized for another 6 months.

The prices below reflect six-month average unit prices.

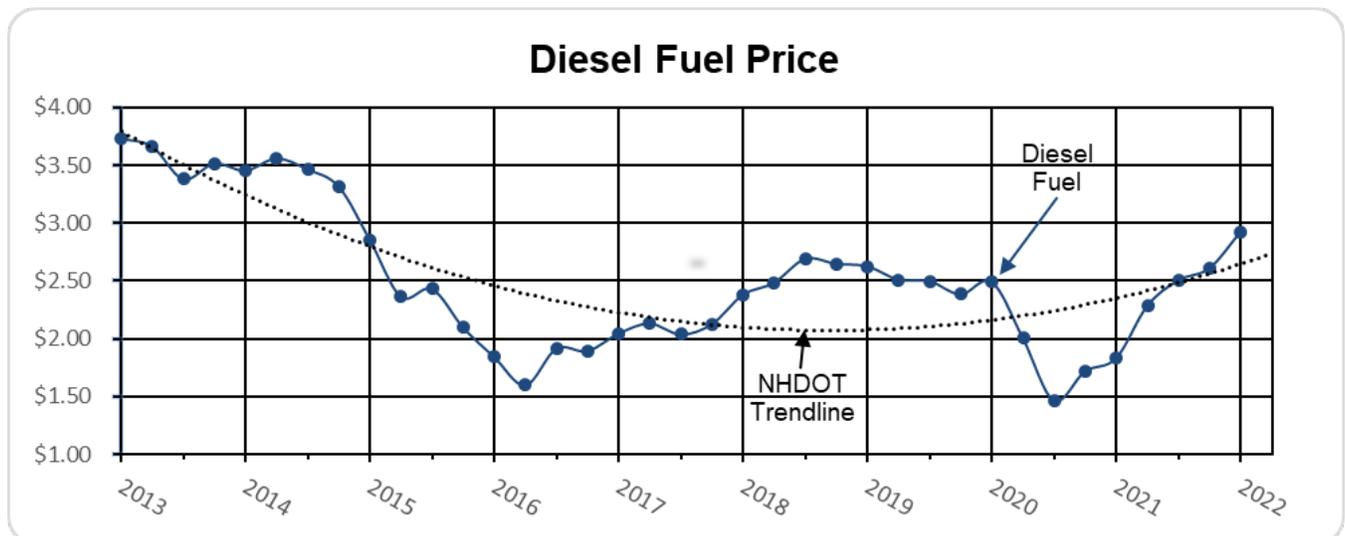

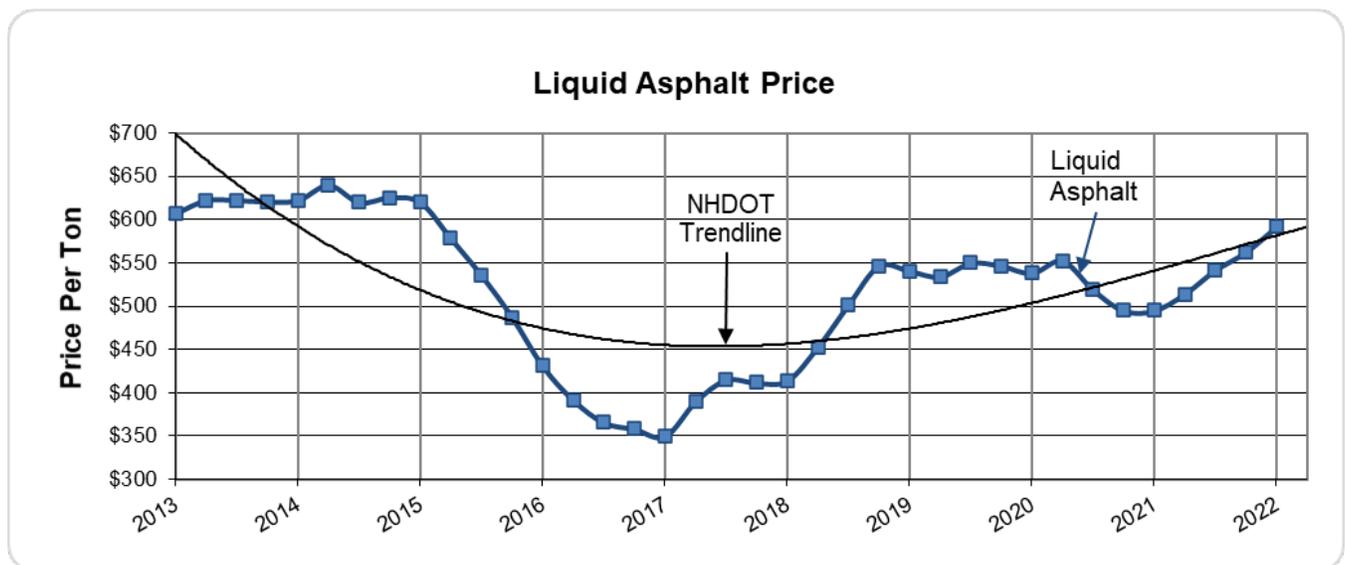

The New Hampshire CCI for the second half of 2021 closed at (321), up from (292) for the six month period ending the first half of 2021. The second half of 2021 average price for roadway excavation of \$14.30 per CY was down \$5.74 from the ending of the first half of 2021. Roadway excavation was down 54% (-\$16.66) from the end of 2020. Crushed material was up 17.4 % from \$27.19 to \$31.92 per CY. Structural steel was up second half of 2021 from \$2.13 to \$2.95 per lb. Hot mix asphalt was up 17.5% to \$92.69 per ton. Structural Concrete was down to \$612.35 per CY, a decrease of 23% and a calendar year drop of 55%. Reinforcing steel was up \$0.25 per lb to \$1.66, a 17.6% increase from the first half of 2021.

The following item groups are used to compute the NHDOT CCI. These are the percent in dollars from 2003 to date.	
Hot Mix	49.48%
Crushed Material	14.02%
Roadway Excavation	11.99%
Steel	11.44%
Structural Concrete	9.53%
ReBar	3.54%

Fuel prices rose \$0.42 to \$2.92 per gallon showing a price increase of 16.7% from mid-year price. This was an annual increase of 59.6% (\$1.09 increase). The average asphalt price went up 9.23% or \$50.00 from midyear 2021, with an ending price of \$591.67 per ton.
